

To whom it may concern, My opinion is that the people that have XM radio enjoy the freedom of listening to what they want when they want to! Not always flipping thru stations during the day having to find a station to suite their needs at a certain time. I know when I'm driving I get tired of always having to listen to some type of morning, afternoon, or evening talk show. All I want is to listen to music or important news updates, not somebodys misc. opinions on a subject that does not pertain to anything that interests me. With XM radio I can get what I want! Hopefully in time the people in Colorado will have their own real time traffic reports all the time, and can listen to it if the need arises. Thank you for letting me take the time to voice my opinion.

Sincerely,
Mark W. Friesenegger
Happy XM Satellite customer

Also just a thought, maybe some of these lobbyists should take the time to experience the real difference between satellite radio and any other boring FM radio station!
